RESIN BINS

Model RB150L

Model RB150, self emptying resin bin is designed for use with vacuum loading systems using pickup wands. The bins were designed for use with either virgin or regrind materials, colorants or other uses. Typically used for short runs. The vacuum wand, maximum 4" diameter, is inserted into a tube on the bin. This tube is angled and directed to the lowest point in the bin where resin can be picked up by the wand. A clean-out door facilitates fast and thorough bin cleaning for any residual material during material changes. Unit comes with a lid, 4" full swivel of approximately 158 lbs., based on styrene shipping weight is estimated at 90 lbs. per unit.

FEATURES:

- High capacity
- Rugged design
- Superior fit and finish
- Locking casters
- Stackable design
- Rugged lid

SPECIFICATIONS:

Model	Size	Capacity	Holds
RB150L	23"L x 23"W x 37.6"H	158 lbs	3+ bags
