CORRUGATED STEEL SILOS

Buying in bulk is certainly cheaper than buying in smaller packaged shipments... often several cents per pound difference! Storing smaller packages of dry materials inside your plant also takes up valuable production space. Even more cost comes with the manpower needed to open and move these smaller containers.

The answer is a galvanized steel Corrugated silo from Hamilton. Our chart of available models shows the range in capacity from 5,000 to 250,000 lbs., 6 ft. to 21 ft. in diameter. Hamilton Silos require minimal maintenance and are highly resistant to weather conditions and industrial pollution. They help you eliminate the possibility of costly production downtime due to interruption in material deliveries, because you're assured of a good reserve supply. Plant efficiency is increased because materials move from the bulk bins automatically to points of need with a minimum of operator involvement.

Approximate Capacity						
Description	Model No.	Maximum CU. FT.	Usable W/30° Angle of Repose	Max. LBS.	Height to lid (feet)	Approx. Weight LBS.
9' Diameter 45° Hopper	EC9412	439	385	15,365	13.0	1,304
	EC9413	608	554	21,280	15.8	1,440
	EC9414	777	723	27,195	18.5	1,617
