SUPER SACK UNLOADER

Take advantage of super sack material pricing with an economical in plant super sack unloading system. We custom design super sack stations that are convenient to use and fit both your budget and your material handling requirements.

Our most popular model is this manual fork lift carriage type (shown here). Adjustable for bags ranging in size from 62" to 90" tall, shown here with an untie chamber, iris valve shut off, and a receiving hopper designed to match up to any of our standard vacuum boxes or screw conveyor systems. Contact us to see just how affordable a super sack station can be!
